25X1 5. [ ] JSW) Talked with Boyd Crawford, House Foreign Affairs Committee staff, indicating that I had some word Representative Derwinski was planning to introduce a resolution to investigate USIA and RFE. Crawford checked and said nothing had been formally filed and he knew of nothing on this but he would let us know if he hears anything. He is fully alert to the situation as is Chairman Morgan, of the Foreign Affairs Committee, of which Derwinski is a member. Crawford also advised that the Chairman would like to extend an invitation later this month for the Director to appear before the full Foreign Affairs Committee. He will let me know later as to possible dates.

25X1 6. [ ] JSW) Met with Senator Everett Dirksen at his request. He gave me some background on his discussions with the President, Senator Mansfield and other points regarding the Consular Convention. He had read the Director's letter to the President. He felt that he should discuss this personally with the Director. A tentative time was set for four o'clock next Tuesday. He also indicated that he was aware that the Director had also discussed this with Senator Russell.

25X1 7. [ ] GLC) George Murphy, Joint Committee on Atomic Energy staff, called to say that the Joint Committee would be sending us a letter shortly asking the Agency for an estimate of the amount of money (in terms of gross national product) which the Chinese Communists are investing in their total atomic energy program. Murphy said they would like this figure broken down if this was possible.

Murphy said he understood from the AEC that [ ] had given his approval to the AEC's seeing a copy of the transcript of the Director's briefing of the Joint Committee. Murphy wished to verify this adding that if it was done he would like to assure that the transcript was placed in the hands of the proper person because of the special security classifications involved. 25X1

25X1 8. [ ] GLC) Left for Bob Michaels, House Appropriations Committee staff, a copy of the ORR report "The USSR: About to Enter the Automotive Age?"
